Set Up

11. In Products, on the left side dashboard, click Facebook Login > Settings.

Set the options as in the image below:

You are currently editing a test version of **test app**

Your app has standard access to public_profile. To use Facebook Login, switch public_profile to advanced access. [Get Advanced Access](#)

Client OAuth settings

☒ **Client OAuth login**
Enables the standard OAuth client token flow. Secure your application and prevent abuse by locking down which token redirect URIs are allowed with the options below. Disable globally if not used. [\[?\]](#)

☒ **Web OAuth login**
Enables web-based Client OAuth Login. [\[?\]](#)

☒ **Enforce HTTPS**
Enforce the use of HTTPS for Redirect URIs and the JavaScript SDK. Strongly recommended. [\[?\]](#)

☐ **No**

Force Web OAuth reauthentication
When on, prompts people to enter their Facebook password in order to log in on the web. [\[?\]](#)

☐ **No**

Embedded Browser OAuth Login
Enable webview Redirect URIs for Client OAuth Login. [\[?\]](#)

☒ **Use Strict Mode for redirect URIs**
Only allow redirects that exactly match the Valid OAuth Redirect URIs. Strongly recommended. [\[?\]](#)

Valid OAuth Redirect URIs

A manually specified redirect_uri used with Login on the web must exactly match one of the URIs listed here. This list is also used by the JavaScript SDK for in-app browsers that suppress popups. [\[?\]](#)
